

# Agustín Dalvit

Frontend Developer - React / React Native /  
TypeScript

**Location:** Córdoba, Argentina.

**Email:** [agusdalvit@gmail.com](mailto:agusdalvit@gmail.com)

**LinkedIn:** <https://linkedin.com/in/agustindalvit>

**GitHub:** <https://github.com/zineR1>

## PROFESSIONAL SUMMARY

**Frontend Engineer specialized in React and TypeScript**, with experience building high-performance web applications and complex products in enterprise environments. Currently working at **Accenture**, contributing to large-scale financial systems with a focus on performance, architecture, accessibility, and engineering best practices.

In parallel, I build personal projects — including Vincufy — where I work with React Native, Nest.js, PostgreSQL, Google Cloud, Firebase, and modern UI/UX principles.

## TECHNICAL SKILLS

### Frontend:

React, React Native, Expo, Next.js, TypeScript, JavaScript (ES6+), Zustand, Redux, CSS, Tailwind, Responsive Design, UX/UI, Figma

### Architecture & Performance:

SPAs, Microfrontends, Performance Optimization, Modular & Scalable Architecture

### Backend / Full-Stack:

Node.js, Express, REST APIs, PostgreSQL, Sequelize, Prisma, JWT Authentication

### Tools & Workflows:

Git/GitHub, React Query, Browser DevTools, CI/CD (working knowledge), Testing (Jest; basic familiarity with e2e testing)

---

## EXPERIENCE

### Accenture - Frontend Developer (Full Stack when needed)

May 2022 – Present | LATAM (Remote)

- Lead frontend initiatives in enterprise-scale financial projects
- Collaborate with design teams to validate feasibility, improve UX, and define technical constraints
- Develop responsive SPA applications with React and TypeScript, ensuring high performance and maintainability
- Participate in architectural discussions and implement modern patterns (microfrontends, modular design, state management)
- Collaborate with QA and backend teams to ensure smooth production releases and robust testing
- Technologies: **React, TypeScript, Zustand, React Query, Node.js, Next.js, Microfrontends**

### Vincufy – Cofounder & Technical Lead (Side Project)

Nov 2022 - Present

- Led technical decisions and co-built the web **frontend** and **mobile app UI** (Expo, React Native, React Native Web), ensuring consistency, performance, and scalability across platforms.
- Played a key role in designing and implementing backend systems (Nest.js, PostgreSQL, Prisma), contributing to architecture, APIs, and core application logic.
- Responsible for responsive layout, UI/UX implementation, and authentication flows (JWT)
- Worked closely with product and design to shape key features and user experience
- Technologies: **React, React Native, Nest.js, Node.js, PostgreSQL, Prisma, JWT, TypeScript, Firebase, Google Cloud**

## EDUCATION & TRAINING

### Universidad Nacional de Córdoba (UNC)

Business Administration — 2 years completed

2019–2021, Córdoba, Argentina

### Full-Stack Web Development Program (700+ hours)

2021–2022

- 
- Intensive training in JavaScript, React, React Native, Node.js, PostgreSQL, and modern web development workflows

## ACHIEVEMENTS & NOTABLE WORK

### 2nd Place – National Startup Competition (Universidad Siglo 21 & Banco Santander)

- Award for *Vincufy* in a nationwide competition among early-stage technology startups

### Tech Vendor - Universidad Siglo 21 “Semana 21”

- Delivered the full accreditation and attendee interaction system for one of the largest university events in Argentina

## STRENGTHS

- Strong ownership and product mindset
- Experienced collaborating with design, product, QA, and backend teams
- Ability to improve code quality and lead refactors toward modern architectures
- Experienced shipping features used by thousands of users

## LANGUAGES

**Spanish:** Native

**English:** C1 (EF SET Certificate: C2)
